South Part of International Financial City in Central Business Area in Jinan, China

Based on the master plan, four mixed-use high-rise buildings are being constructed in the Central Business District of Jinan (Shandong, China). The office towers, which will be up to 100m high and divided into 22 floors, will house shops, offices and government facilities. Viewing platforms and green roof terraces characterize the roofscapes of the high-rise buildings, enhancing the quality of living and working. The ground floor zone of the building ensemble will offer commercial uses as well as a citizens' hall. Landscaped open spaces between the buildings invite visitors to stroll and cross the area.
