

Gerber Architekten

University of Applied Sciences, Würzburg-Schweinfurt

Landscape

Embedded in the stunning hilly landscape, the design for this university is based on the dialogue between architecture and nature. Two L-shaped buildings enclose a rectangular, open courtyard where a wide staircase provides access into the building complex. The elevation on the south side of the building offers wide open views far into the valley as well as a unique experience of converging interior and exterior spaces, creating an attractive environment for teaching and research, communication and creativity.
